## **Subpart B -- Technical Standards**

# $\S$ 1194.21 Software applications and operating systems.

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to	Not supported	
run on a system that has a		
keyboard, product functions shall		
be executable from a keyboard		
where the function itself or the		
result of performing a function		
can be discerned textually.		
(b) Applications shall not disrupt	Supported	
or disable activated features of		
other products that are identified		
as accessibility features, where		
those features are developed and		
documented according to industry		
standards. Applications also shall		
not disrupt or disable activated		
features of any operating system		
that are identified as accessibility		
features where the application		
programming interface for those		
accessibility features has been		
documented by the manufacturer		
of the operating system and is		
available to the product		
developer.		
(c) A well-defined on-screen	Partially supported	The focus in some dialog boxes can be
indication of the current focus		detected.
•		detected.
shall be provided that moves		detected.
among interactive interface		detected.
among interactive interface elements as the input focus		detected.
among interactive interface elements as the input focus changes. The focus shall be		detected.
among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that		detected.

(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Partially supported	The VoiceOver "speak text" function works when the mouse is passed over elements in dialog boxes and most elements of the
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supported	
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	n/a	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Partially supported	Some on-screen controls and correctly labeled or adjusted.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Partially supported	The Adjust HUD can be used to adjust color and contrast properties.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supported	
(I) When electronic forms are used, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Partially supported	See 1194.21(a) and (f)

# **Subpart C -- Functional Performance Criteria**

## § 1194.31 Functional performance criteria.

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Not supported	
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	Partially supported	iDVD can be successfully operated by users who are visually impaired and rely on a screen magnifier or custom-display alterations.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for assistive technology used by people who are deaf or hard of hearing shall be provided.	Supported	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Supported	Visual alerts can be used in place of audible alerts.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for assistive technology used by people with disabilities shall be provided.	Supported	
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Partially supported	iDVD can be used with Sticky Keys to avoid simultaneous actions. Mouse Keys can be used to execute certain fine-motor functions instead of the mouse.

#### Subpart D -- Information, Documentation, and Support

#### § 1194.41 Information, documentation, and support.

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Partially supported	Online documentation can be found at http://www.apple.com/support/idvd/
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	Information about Apple's built-in access technologies is available at <a href="http://www.apple.com/accessibility">http://www.apple.com/accessibility</a> .
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported	E-mail support and discussion groups are available at http://www.apple.com/support/idvd
