

Apple iOS Learning Solutions

Achievement at your fingertips.

iPad and iPod touch are powerful education tools that put anytime, anywhere learning directly into students' hands. With iOS devices like these, students have access to the Internet, as well as productivity tools and core curriculum content in a mobile, media-rich style that lets them learn as they live—on the go. And with Apple mobile learning solutions—the Apple iPad Learning Lab, Apple iPod Learning Lab, and Bretford PowerSync Case for iPod—educators can manage multiple devices in the classroom with ease.

Enhanced learning with iOS devices

Innovative educators across the globe are using iPad and iPod touch to deliver curriculum in new and exciting ways. Whether enabling students to review background information outside of class, practice challenging math concepts, or improve language acquisition skills, iPad and iPod touch enrich teaching and learning. And with iWork for iPad, students can create documents, presentations, and spreadsheets on the go.¹ AirPrint even allows them to print wirelessly.²

Teachers and students can create their own media-rich content for iPad or iPod touch using a Mac and the included iLife suite of digital media applications. And iTunes U offers a wealth of free educational content created by universities, state departments of education, museums, and other institutions that supports learning in every subject area.³

Innovative solutions simplify management

The Apple iPad Learning Lab and Apple iPod Learning Lab streamline the management of classroom sets of iOS devices. Each lab includes a compact and durable rolling cart that stores, charges, and secures multiple devices quickly and cost effectively. Carts roll easily around campus, so multiple classes can benefit. Content can be synced between a classroom Mac and multiple devices, and the carts can be locked to secure the devices when they're not in use.

For even more portability, the Bretford PowerSync Case for iPod lets you carry, store, charge, and sync up to 20 iPod devices at a time. The hardshell case makes it easy to transport iPod devices and ensures that they are safe and secure.

Free getting started guide

You can get up to speed using iPad or iPod in your classroom with help and recommendations from *Getting Started with Apple iOS Devices: A guide for using iPad, iPod touch, and iTunes for K-12 teaching and learning*, available as a free download at www.apple.com/education/resources. The guide includes helpful classroom management tips, suggestions for creating and locating educational content, lesson ideas, and more.

iOS devices in action.

iPad and iPod touch are packed with advanced features like a widescreen Multi-Touch display, accessibility options, a long-lasting rechargeable battery,⁴ and more.

- **Browse the Internet.** Built-in Wi-Fi and Safari—the most advanced web browser ever on a mobile device—let students do research in and out of the classroom (requires Wi-Fi connection).
- **Do more on the go.** Productivity apps are included for taking notes, keeping calendars, and communicating over email (requires Wi-Fi connection).
- **Tap into the App Store.** Right out of the box, iPad and iPod enhance learning. Add the thousands of apps for education available on the App Store, and learning is enriched and personalized. You'll find apps for graphing equations, building vocabulary skills, testing geography knowledge, and so much more.⁵
- **Read anywhere.** With the iBooks app, students have access to a vast collection of books right on their iPad or iPod. They can download books (many are free) from the iBookstore and then browse, search and highlight text, and add bookmarks and notes.

An Apple mobile learning lab is the ideal way to give students access to the learning power of iPad or iPod touch. Choose a preconfigured lab or create one that's just right for your school.

Custom mobile learning solutions

Educators can also build a custom solution that addresses their students' specific needs.

Add a MacBook with the included iLife suite of digital media applications for content creation. Or choose from a wide variety of iPad or iPod devices, accessories, or professional services. To build a custom iPod solution, visit http://education.apple.com/custom_ipod_lab/. To build your own iPad solution, visit http://education.apple.com/custom_ipad_lab/.

Apple Professional Development

For educators and administrators who are new to iPad or iPod, Apple offers two- and four-day workshops designed to help them experience the educational value of these technologies. They'll also learn strategies for integrating the Apple iPad Learning Lab or Apple iPod Learning Lab into their classrooms. Visit www.apple.com/education/professional-development for more information.
