

Final Cut Studio Solutions

Third-Party integration featuring Blackmagic Design

Intensity Pro

Intensity Pro introduces professional HDMI and analog editing in HD and SD. Intensity Pro allows you to upgrade to Hollywood production quality with uncompressed or compressed video capture and playback using large screen HDTVs.

Intensity Pro includes HDMI and component analog, NTSC/PAL and S-video connections in a low cost plug-in card. Capture from HDMI cameras, VHS and Video 8 decks, gaming consoles, set-top boxes and more.

When it comes to codecs, HDV's heavy compression and limited 1440 x 1080 resolution can cause quality problems and slow down editing. Intensity Pro eliminates these problems and lets you choose from Apple ProRes 422, uncompressed video and Online JPEG for full 1920 x 1080 HDTV resolution.

Intensity Pro can capture at 1080i, 720p or NTSC/PAL video.

Intensity Pro's HDMI or analog output is perfect for incredible big screen video monitoring. It uses an uncompressed video connection direct to Final Cut Pro's real time effects renderer. Since it can work in uncompressed format, the computer spends less time bringing the image to screen, which in turn frees up additional processing power to support more real-time effects and video layers.

Intensity Pro is fully compatible with Apple Final Cut Pro, as well as Motion™, Color™, DVD Studio Pro™ and many more.

Products highlights

Connect to Anything

HDMI and Y,B-Y,R-Y inputs and outputs for capture and playback for all types of video devices.

Incredible Audio

2 channels of analog audio and 2 channels of HDMI audio inputs and outputs.

Integrated with Final Cut Pro

Real time effects support in Apple Final Cut Pro™.

World's First HDMI capture card

Native digital HDMI connections for real time capture and playback at the highest quality possible.

Supports popular TV standards

Work in 1080 lines at 50i, 59.94i, and 720 lines at 59.94p. NTSC, PAL and S-Video.

Supports all popular formats

Uncompressed and compressed capture and playback. Edit in ProRes 422, DV, JPEG, DVCPRO HD and playback in HDV.

Affordable Price

Intensity Pro RRP US\$349.
