

Maximum budget control.  
More technology for students and faculty.

### Apple Education Finance Program

Apple offers flexible finance options that allow you to leverage your technology dollars. You'll benefit from payment, leasing, and refresh options that are tailored for you. With financing, you can select a payment schedule that's right for your budget cycle and match payments to the life of the equipment. You can also include software, support, and training in the lease payment.

Whether your technology plan calls for a computer lab or a full deployment of hardware, software, installation, and professional development, Apple's education leasing partners will design a financing solution that fits your needs.

#### Expand your potential

Apple's education leasing partners can enable you to:

- Acquire several years' worth of equipment at once while maintaining annual budgets.
- Keep your technology current.
- Explore possibilities beyond government funding and your annual IT budget.

Learn how financing can streamline the management of your technology plans and your budget. Contact your Apple Education Representative, an Apple Authorised Reseller or an Apple preferred leasing partner below.

#### Options to meet the learning needs of today's students.

- Master Rental Agreement: Low periodic payments and the option to purchase or return equipment at the end of the term.
- Total Solution Finance: Hardware, software, maintenance and training can all be included in a lease from Apple's preferred finance partners.
